AI SOLUTIONS ARCHITECT

PROFILE

Professional with 5+ years designing and deploying end-to-end AI systems across deep tech, biotech, cleantech, and climate sectors. Specialised in LLM pipelines, agentic AI workflows, RAG architectures, and governance frameworks that move organisations from isolated GenAI pilots to production-grade deployment. Delivered AI systems and adoption strategies with 300+ founders, researchers, and executives where achieved measurable business outcomes at scale. Secured and led private and funded AI programs supporting 200+ ventures from ideation to market. Multilingual across English, Spanish and Catalan, with active reach across EMEA and Latin America.

CORE COMPETENCIES

AI Solutions Architecture	AI Adoption Strategy
LLM & LLMOps	Research-to-Market Translation
Agentic AI & Multi-Agent Systems	EU Project Management
RAG & Vector Databases	Deep Tech Commercialisation
AI Governance & EU AI Act	Enterprise AI Deployment
Responsible AI Frameworks	Startup Mentorship & Venture Building
Python for AI/ML	Generative AI

PROFESSIONAL EXPERIENCE

Tech Ventures Manager | Esade (Barcelona, Spain)

2026 – Present

Architecting AI-powered venture pipeline systems for deep-tech founders, translating research-stage IP into investor-ready AI product strategy at one of Europe's top-ranked business schools.

Designing and facilitating AI and tech ecosystem experiences that bridge academic research, entrepreneurial methodology, and applied AI deployment for Esade's founder and executive community.

AI Programme Architect & Lead | AllWomen (Barcelona, Spain)

2026 – Present

Designed and deployed a 5-day Human-AI Co-thinking curriculum for 3 cohorts (100+ female founders) under a NextGenerationEU program, achieving 95% completion and 4.5/5 NPS.

Built personalised AI copilot architectures for 75 companies; all launched measurable outcomes like new revenue streams, redesigned operating models, or AI-powered processes within 30 days of deployment.

Covered the full AI deployment lifecycle per company: AI-assisted financial viability modelling, competitive war-gaming with AI agents, and personalised strategic copilot design.

AI Programme Leader & Solutions Architect | RMIT (Barcelona, Spain) 2023 – 2026

Architected RMIT Europe's end-to-end AI strategy: a hybrid governance-to-deployment framework moving the institution from isolated GenAI pilots to production-grade Agentic AI, covering executive policy, LLMOps pipelines, and frontline workflow integration.

Deployed AI systems and adoption strategies with 70+ researchers and 200+ startups across business validation, market entry, and competitive intelligence; built 3 reusable LLM-powered toolkits now embedded across program infrastructure.

Designed AI-powered competitive war-gaming simulations to stress-test startup strategies against live market conditions, cutting average investor pitch preparation from weeks to days.

VP Entrepreneurship Commission | 22@Network (Barcelona, Spain) 2025

Co-designed an AI-assisted screening pipeline that processed 115 applications, selected 32 startups, and generated 420 curated investor meetings with 25 registered funds at the 22@ Demo Day.

Managed a direct innovation community of 2000+ startups, 500+ corporates, and 150+ investors across one of Europe's largest tech districts.

Brokered partnerships with VCs, accelerators, and innovation hubs, positioning Barcelona as a key European hub for Deep Tech investment.

Startup Mentor Deep Tech | University of Helsinki (Finland) 2023 - 2025

Mentored science-based startups in bioeconomy and circular economy on go-to-market architecture, business model design, and funding readiness — supporting teams from research proof-of-concept to investor-ready pitch.

Co-Founder & CEO (Founded and Sold) | Virideu (Barcelona, Spain) 2021 - 2022

Founded, scaled, and sold a sustainability data startup in 12 months that was helping brands architect EU Green Deal compliance strategies using data-driven communication systems.

Co-Founder | Delivery Central & Granel Eco (Bogota, Colombia) 2015 - 2025

Built a sustainable delivery company to 35% average annual revenue growth, 87% customer retention, and 91% satisfaction over a decade, demonstrating operational system design at scale.
